

## Average working times (cleaning only) by object groups

During the first two projects, we only counted "objects treated per day". As Collections were rather well organized in groups, we were able to extrapolate hours worked in cleaning per object. For the third project, collections were very mixed. We therefore dedicated worktables to certain object groups and noted hours worked for cleaning by object group. Below you will find this data that is more precise than data we extrapolated from previous projects.

### Project "Collection 3"

#### average time for cleaning (asbestos fallout)

	hours/object	Min./object
large furniture	3.24	
paintings with frames	4.09	
huge, fragile paintings with frames	9.03	
graphic art and books	0.73	4.36
objects (asbestos fallout)	0.14	8.13
objects <i>without</i> asbestos fallout (different storage rooms)	0.09	5.27
Average over all cleaned object types	0.19	11.25

Table 1: Average Times for project 3 over a period of 4 months.

### Remarks and Details for Table 1

Depending on the amount and type of dirt on the treated objects, cleaning times might vary. Below find tables listing average time for a period of 3 month and for 4 months. The average time has risen a lot as we hit a much dirtier part of the collection in the 4<sup>th</sup> month.

#### **cleaning only: large furniture**

	no. objects	hours	h/object
period 11.1.-31.3. 21	204	854.75	4.19
period 1.4.-16.4.	17	69.58	4.09
<b>Total</b>	<b>221</b>	<b>924.33</b>	<b>4.18</b>

#### **cleaning only: graphic art + books (recorded as of 4.3.)**

	no. objects	hours	h/object	Min/object
period 4.3.-31.3.21	4'221	141.25	0.033	2.01
period 4.3.-30.4.21	5'736	472.99	0.082	4.95

many very dirty books

#### **cleaning only: objects with asbestos fallout**

	no. objects	hours	h/object	Min/object
period 11.1.21-31.3.21	9'180	1'127.5	0.12	7.37
period 11.1.21-30.4.21	9'955	1'375.0	0.14	8.29
