

Define the size!

A crash course in basic data collecting for storage planning

© 2021 Prevalt GmbH, www.prevalt.ch

1

Preliminaries

This presentation is available as a handout for download @ www.prevalt.ch/download

Author: Joachim Huber

Prevalt GmbH
Konzepte für die Kulturgüterhaltung

2

Define the size!

Sometimes it is difficult to define the space needed to store your collection adequately

© 2021 Prevalt GmbH, www.prevalt.ch

3

Define the size!

Sometimes it is difficult to define the space needed to store your collection adequately

© 2021 Prevalt GmbH, www.prevalt.ch

4

Some basics

You need to know what kind of storage equipment is available in order to be able to collect the relevant data for future planning.

Get information from commercial companies.

8

Types of storage equipment

standard shelves

Width: 800, 900, 1'000, 1'100, 1'200, 1300 mm
Depth: 250, 300, 400, 500, 600, 700, 800 mm

undivided shelves

Width: variable
Depth: 600, 800, 900 mm

© 2021 Prevat AG, www.prevat.ch

9

Types of storage equipment

long span

Width: 1'800, 2'200, 2'700, 3'200, 3'600 mm
Depth: 600, 800, 1'000, 1'200 mm

pallet rack

Width: 1'800, 2'200, 2'700, 3'200, 3'600 mm
Depth: 600, 800, 1'000, 1'200 mm

© 2021 Prevat AG, www.prevat.ch

10

Types of storage equipment

cantilever

Depth: 400, 600, 800 mm

mobile platform

Width: up to 12'000 mm
Depth: 600, 800, 1'000, 1'200 mm

© 2021 Prevat AG, www.prevat.ch

11

Types of storage equipment

fixed mesh

sliding mesh

Height: up to 6000mm, Length up to 7'000 mm
Axial distance from the neighboring mesh 250 - 500 mm,

© 2021 Prevat AG, www.prevat.ch

12

Types of storage equipment

cabinet **glazed cabinets**

Depth: 300, 400, 500, 600mm

© 2021 Prevat AG, www.prevat.ch

13

Types of storage equipment

grafic drawer **flag cabinet**

Format A1, A0, A0+

up to 3'000 x 3'000 mm

Lagerausstattung

1 Ebene

Boden | Schublade | Gitter

- Fachboden
- Palettenregal
- Weitspannregal
- Kragarmregal
- Podest
- Schublade
- Auszugtablar
- Grafikschublade
- Fahنشubblade
- Münzkasten
- ausziehbare Vertikalgitter

2 selbsttragend

Bügel | Behälter | Rolle

- Kostüme
- Uniformen
- Schachtel oder Laden auf Winkelträgern
- auf Hohlkerne gerollte Objekte

3 Speziallösungen

- Aufhängungen
- Tapissierrollen
- Teppichpaternoster

4 freistehend

- Palett/Socket
- Rungengestelle

© 2021 Prezent GmbH, www.prezent.ch 28

28

Where does data come from?

- from analogue data (lists)
- from electronic data (data base, excel file)
- from individual objects
- from floor plans

from the actual storage situation

✓

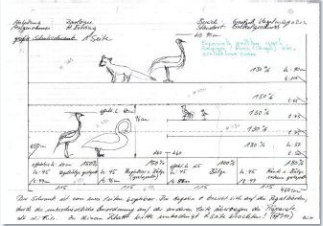

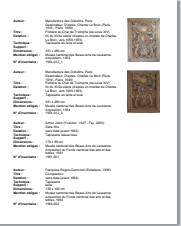

(volume, vertical surface)

easiest way to go

© 2021 Prezent GmbH, www.prezent.ch 30

30

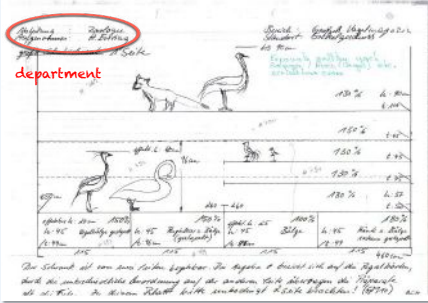

Using analog data (paper based documents, lists)

© 2021 Prezent GmbH, www.prezent.ch 31

31

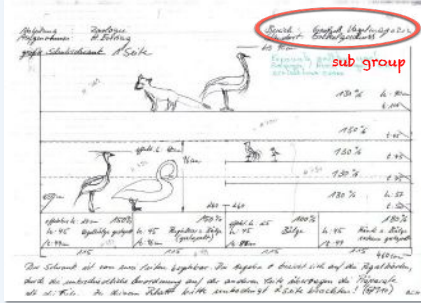

Hand written data

all information needed is available but **not** computable

33

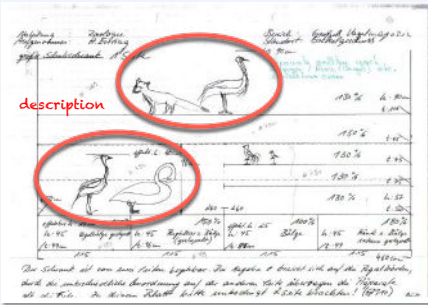

Hand written data

all information needed is available but **not** computable

34

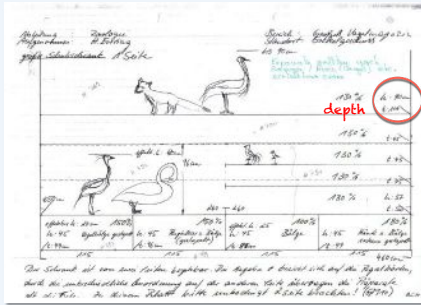

Hand written data

all information needed is available but **not** computable

35

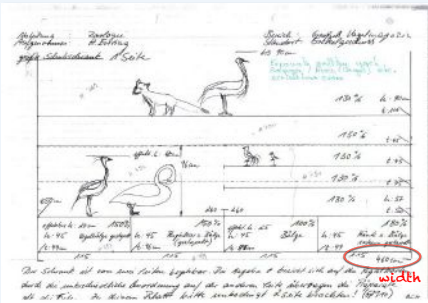

Hand written data

all information needed is available but **not** computable

36

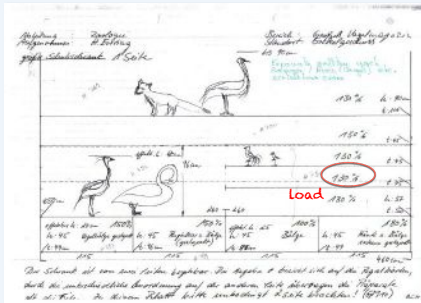

Hand written data

all information needed is available but **not** computable

37

Hand written data

all information needed is available but **not** computable

38

Printed data from data base

Auteur : ~~Manufacture des Gobelins, Paris~~
 Dessinateur; D'après: Charles Le Brun (Paris, 1619 - Paris, 1690)

Titre : Portière du Char de Triomphe (de Louis XIV)

Datation : fin du XVIIe siècle (d'après un modèle de Charles Le Brun, vers 1659-1665)

Technique : Tapisserie en laine et soie

Support :

Dimensions : (351 x 260 cm) Dimension of tapestry roll is missing!

Mention obligat. : Musée cantonal des Beaux-Arts de Lausanne.

N° d'inventaire : Acquisition, 1954
 1954-012_2

- Information is often not very helpful
- ~~there is irrelevant information for storage planning~~
- relevant information is missing
- as a printed document it is not computable

© 2021 Provant SM, www.provant.ch 40

40

Measuring individual objects

does not really help ...

© 2021 Provant SM, www.provant.ch 41

41

Measuring individual objects

does not really help ...

© 2021 Provant SM, www.provant.ch 42

42

Measuring individual objects

except in some cases

© 2021 Provant SM, www.provant.ch 43

43

Measuring individual objects

- what is measured? painting, frame, crate ?
- object mesures often don't reflect the real volume needed
- which is the relevant information on storage equipment?

© 2021 Provant SM, www.provant.ch 45

45

Electronic data (data base, excel)

no.	designer	producer	description	date (design)	material	measures	quantity	information
6	Bruno Fiala	Vorwänge Reinhold Karlson Handwerk, München	Caraculobras No. 2008	Um 1900	polystyrol (foam)	195 x 125 x 35 cm		part of a whole inventory

© 2021 Provant SM, www.provant.ch 46

46

Electronic data (data base, excel)

no.	designer	producer	description	date (design)	material	measures	quantity	information
6	Bruno Paul	Vereinigte Werkstätten für Kunst im Handelw., München	Gartenbank (Jagel, Mod. Nr. 2938)	Um 1903	pinewood (1) mirror (steel)	195 x 125 x 35 cm	1	part of a whole inventory

No!

One information per data field – no multiple information in one data field
 Numeric fields for numbers – no text in data fields (unless this is a formatted suffix like cm)

Photo: Wien, Kunsthistorisches Museum

© 2021 Provent GmbH, www.provent.ch 47

47

Electronic data (data base, excel)

no.	designer	producer	description	date (design)	material	measures	height	width	depth	quantity	information
6	Bruno Paul	Vereinigte Werkstätten für Kunst im Handelw., München	Gartenbank (Jagel, Mod. Nr. 2938)	Um 1903	pinewood (1) mirror (steel)	195 x 125 x 35 cm	195 cm	125 cm	35 cm	1	part of a whole inventory

field is formatted

- do produce useful and **computable** data (one information per data field!)
- data in museum data bases and excel is usually „single object data“
- Do always use the same table structure (number and position of columns)

© 2021 Provent GmbH, www.provent.ch 48

48

Latest database

real situation „as it is“ including load future situation future system high growth factor additional information documentation

© 2021 Provent GmbH, www.provent.ch 49

49

Floor plan

- surface gives an idea of the space (if measures available)
- no information on quality (heights, obstacles, etc.)
- no information on percentage of surface or volume used
- no information on storage equipment (unless mentioned)
- no information on objects stored and load

© 2021 Provent GmbH, www.provent.ch 53

53

Space actually occupied

Restaurant equipment The only collection object farmers equipment

to what extent is the surface used?
by whom is the surface used?

card board for boxes

63

Separate present from future

Present

Future

© 2021 Prevat AG, www.prevat.ch

65

4 steps in collecting data

- 1st step record what you actually see
type of storage furniture, measures, photo
- 2nd step define the actual load of the system (%)
- 3rd step define what you want to change
dimension, system (can be added later)
- 4th step define space for future growth (%)
per group (can be added later)

© 2021 Prevat AG, www.prevat.ch

66

Measuring and system load

<p>present</p> <p>Hight Width Depth</p> <p>optional change of dimension →</p> <p>Storage furniture</p> <p>optional change of system →</p> <p>Load %</p>	<p>future</p> <p>Hight Width Depth</p> <p>Storage furniture</p> <p>Load %</p>
--	--

© 2021 Prevat AG, www.prevat.ch

67

How do we measure ?

- Measuring of the actual situation means **always the usable volume or surface over all**
- Keep in mind that your first shelf is always 10-15 cm above floor level!

© 2021 Prevat AG, www.prevat.ch

68

How do we measure ?

© 2021 Prevat AG, www.prevat.ch

69

71

72

73

74

75

78

79

80

81

82

83

Think in virtual modules

85

Reserve for future growth

actual situation + load + growth

do not mix up load and growth!

(Sub-) Standard situation

Accurate storage (careful safekeeping)

Accurate storage with space for future collection development

90

Reserve for future growth

actual situation + load = 100%

Nobody in museums knows how long the reserve space will last.

- 10% easy
- 20% good argument
- 25% very good argument
- up to 29.99% exceptional
- ≥ 30% impossible *

* except for pioneer institutions

© 2021 Preart AG, www.preart.ch

92

Summary - 10 aspects to keep in mind

© 2021 Preart AG, www.preart.ch

93

7 basic informations you need

1. object group, **denomination** (with reasonable accuracy)
2. **location** of the actual store (where data comes from)
3. **dimensions** of actual storage equipment or module (height, width, depth) volumes or surface occupied (m², m³) are calculated from this data
4. **system load** as a percentage (too dense, superposed, affecting other objects)
5. **growth** for future collection development
6. **actual storage equipment** (ok, or to be changed)
7. an **image** of the situation (for every entry)

© 2021 Preart AG, www.preart.ch

94

3 supplementary informations

1. **environment** (temperature, humidity, air pollution, light)
2. **risks** (bad condition or instable structure of object)
3. **potential hazards** (pests, contamination, toxic substances, radioactivity, heavy object, difficult to handle)

© 2021 Preart AG, www.preart.ch

95

From data to reality

Plenty of raw information

© 2021 Preart AG, www.preart.ch

96

From data to reality

© 2021 Preart AG, www.preart.ch

97

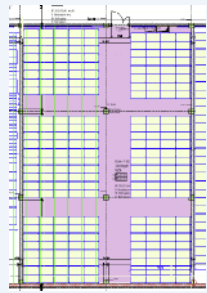

From data to reality

- With all the collected data (volume, surface, type of equipment, dimensions) and the future room height you can define now your storage equipment. ...
- You can define now linear meters of a certain storage equipment type and dimension as well as its footprint.
- Finally you have to place your storage equipment in the available space

© 2021 Prevat AG, www.prevat.ch 98

98

What surface is needed?

- What is the ratio between the projecting surface of the storage equipment (yellow) and the access corridors (purple) ?
- The ratio is depending on:
 - the kind of equipment (fixed or mobile)
 - The type of equipment (shelves, racks, cantilever, mesh, platforms etc.)
 - The dimensions of the equipment

© 2021 Prevat AG, www.prevat.ch 99

99

But what do architects and politicians really want to know?

© 2021 Prevat AG, www.prevat.ch 100

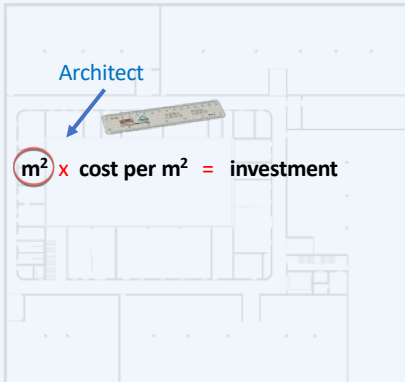

100

$m^2 \times \text{cost per } m^2 = \text{investment}$

© 2021 Prevat AG, www.prevat.ch 101

101

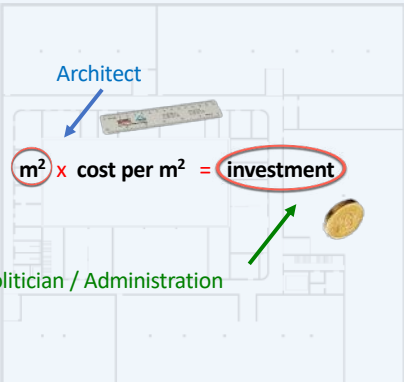

Architect
